

Philip Sutton

candidate for BATMAN

“Let's give our kids a world worth living in, let's reverse global warming!”

Global warming related fires, floods and extreme weather is causing death and destruction around the globe.

In Victoria in 2009 the heat wave killed 374 people; fires killed 175 people and millions of animals.

“No major party is calling for action that will stop a future catastrophe.”

“We need net negative emissions to reverse global warming and recreate a safe climate.”

How do we reverse global warming and get to net negative emissions?

- Use 100% renewable energy
- Create a zero-emission transport system
- Stop the destruction of our native forests
- Move away from high emission agriculture
- Move to an ethical economic model not focused on material and population growth
- Draw down atmospheric carbon

Number all boxes as shown

“Global warming represents both an extreme threat and an amazing opportunity to build a better world.”

Your local **Batman** candidate
Philip Sutton

Philip has been a Fairfield resident for 20 years. He is a leader in the climate movement and a sustainability strategist.

In his early career Philip developed Victoria's Flora and Fauna Guarantee Act, worked on State strategies for energy, conservation and the timber industry and developed the “Nuclear Free” campaign that led to nuclear power being banned in Victoria.

Since 2006 Philip has been campaigning for emergency action to restore a safe climate. He co-authored the seminal work 'Climate Code Red' and developed and runs the climate think tank: RSTI (Research and Strategy for Transition Initiation). Philip also assists the Australian 'Breakthrough' project and USA 'Climate Mobilization' campaign.

“There can be no compromise on global warming.”
