

## SAVE THE PLANET

*Purpose:* Save the Planet is a political party and campaigning organisation that is seeking to implement the needed changes in society to:

- ensure we return to a safe climate (maintaining global average temperatures at preindustrial levels) as quickly as possible and avoid a climate catastrophe as a result of human forced climate change;
- create a sustainable economy and lifestyles.

We want to sustain humanity, civilisation and the diversity of life on the planet and to improve wellbeing for all people. We seek to achieve this through public education and political and non political campaigning.

*Core Policies:* The core policies of Save the Planet are as follows:

1. Implement an emergency speed transition (10 years or less) to a safe climate economy.
2. Transition our economy away from one dependent on constant material and population growth, human exploitation and high interest bearing debt, while continuing knowledge growth, service and technological improvements.
3. Bring climate criminals to justice.

See more policy at our website [www.voteplanet.net](http://www.voteplanet.net)
